

High-Gloss Adhesive/Sealant Kampel COLORFLEX II

ColorFlex II is a High-Gloss Acrylic Caulk. Formulated for use as an adhesive/sealant, its typical applications are sealing miter joints, setting backsplashes on countertop decks, and caulking vertical and horizontal corners. ColorFlex II is packaged in 4 oz and 5 oz squeeze tubes and 10.5 oz cartridges. Choose from our 219 Standard Colors or order any Custom Color Match from your local SeamFil/ColorFlex Distributor.

SET BACKSPLASHES

Use ColorFlex II when setting backsplashes on countertop decks, vanity decks, or any application where adhesion/sealing and color matching are required. After the backsplash is attached and fastened, simply clean excess ColorFlex II with a cloth dampened with water.

SEALS CORNER JOINTS

ColorFlex II seals corner joints with a high-gloss finish. Exact color matching to all laminate, solid surface, wallpaper, paint and tile manufacturers are available from your local SeamFil/ColorFlex distributor. ColorFlex II is formulated to withstand intermittent water.

SEALS MITER JOINTS

ColorFlex II is used as an adhesive sealant in post-formed and fabricated countertops. With one application, your miter joint is permanently sealed with an exact color match.

Available in
4 oz - 5.5 oz
tubes & 10.5 oz
cartridges for
jobs of all sizes.
